Software Developer

+962 788 125 900 | anas.sawalhy@gmail.com | LinkedIn: [Anas Alsawalhy](#) | Amman, Jordan | github.com/AnasAlsawalhy

Full-Stack Software Developer with a strong focus on backend development, working with C#, ASP.NET Core, and SQL Server, with good knowledge of HTML, CSS, and JavaScript. Experienced in building web applications and RESTful APIs, with a focus on clean code, data handling, and system performance.

Education

Bachelor of Software Engineering

Feb 2022 – Jul 2026

The World Islamic Sciences and Education University – Amman (GPA: Very Good)

Projects

Customer Relationship Management (CRM) System

Worked on a CRM web system designed to help businesses manage customers, contacts, deals, follow-up reminders, and email communication in one centralized platform. Developed backend RESTful APIs using ASP.NET Core Web API, Entity Framework Core, and SQL Server, with full CRUD operations for core CRM modules. Built the frontend interfaces using HTML, CSS, and JavaScript, and Implemented secure login with JWT authentication and role-based access control, along with dashboard summary features and reminder management to improve workflow organization and customer follow-up processes.

Complaints and Suggestions System

Developed a full-stack web application to manage and track user complaints and suggestions efficiently. Designed responsive and user-friendly interfaces using HTML, CSS, and JavaScript, ensuring smooth navigation across multiple pages such as submission, tracking, and contact forms. Implemented backend functionality using PHP to handle form submissions, process user requests, and interact with the database. Built a tracking system that generates unique request IDs, allowing users to monitor the status of their submissions. Enhanced data organization and user experience through structured workflows and validation mechanisms.
